WHAT WE DO

The Feral Cat Coalition of Oregon (FCCO) operates a spay/neuter clinic where we provide safe, efficient, quality care. All surgeries are performed by licensed veterinarians.

Our donation-based spay/neuter services are for feral and outdoor stray cats who have a caregiver feeding them. The caregivers trap the cats, bring them to our clinic, and return the cats to where they are being fed. We loan traps at no charge and provide trapping instructions so people can successfully trap all the cats they are feeding. In addition to the spay/neuter surgery, the cats receive pain medication, vaccines, flea treatment, and tipping of the right ear for future identification.

Founded in 1995, FCCO is a 501c3 nonprofit organization supported solely through donations. Our mission is to improve the welfare and reduce the population of feral and stray cats through spay/neuter programs and education.

We have cared for more than 130,000 cats, and we can help you with yours. Together we can reduce the number of cats living on our streets while saving the lives of local birds and other small wildlife on which cats sometimes prey.
